

Certificate 2022-0000503A

The EKOenergy Secretariat confirms that

Poul Johansen Maskiner A/S

Has purchased **685 MWh** of EKOenergy-labelled electricity for
consumption in **Denmark** in **2024**.

The electricity comes from EKOenergy-eligible Danish
wind turbines.

STEVEN VANHOLME
Program manager

EKOenergy is the global nonprofit ecolabel for electricity, gas and heat. In addition to being 100% renewable, the energy sold with the EKOenergy ecolabel fulfils additional sustainability criteria & raises funds for new renewable energy projects.

The LEED standard accepts EKOenergy as an equivalent to Green-e

[Thank you for your purchase of](#)
[EKOenergy-labelled electricity!](#)

EKOenergy guarantees that the renewable energy you buy is generated sustainably.

As a user of EKOenergy, you have the right to use our EKOenergy logo in your communications and on your products. We are happy to provide photos and texts for your publications, feel free to get in touch

The EKOenergy ecolabel is independent, nonprofit and available worldwide. We only label energy that fulfils our strict sustainability criteria, meaning that your energy comes from installations which cause minimal possible damage to the environment and biodiversity.

You also help us raise awareness of sustainability issues and promote renewable energy worldwide. As an initiative of environmental organisations, we organise clean energy campaigns and advocate climate-friendly legislation.

EKOenergy's Climate Fund

At least 0.10€/MWh of your energy purchase goes towards EKOenergy's Climate Fund.

Thanks to your support, our Climate Fund finances new renewable energy projects in regions of the developing world facing significant energy poverty. These projects are managed by experienced organisations with strong local cooperation and address several Sustainable Development Goals.
